

PROTOCOL: What to do in the event of an EAZA EEP/ESB great ape death

In the event of a great ape death within your collection, please do the following:

1. Ensure a full post-mortem examination is performed

Please follow any recommendations provided within the best practice guidelines

2. Examine and sample the heart according to the Ape Heart Project protocol

A copy of this protocol can be found at:

twycrosszoo.org/conservation/research-at-twycross-zoo/ape-heart-project/

Under the section named “Forms and protocols”

3. Inform the vet advisor and relevant species co-ordinator

4. Arrange for the necessary samples to be sent to the Ape Heart Project

Please refer to the document entitled *Important information for the donation of research samples to the Ape Heart Project* and contact us by email

EAZA Great Ape TAG Endorsed Ape Heart Project
